Professional Summary

INPT Engineer specializing in distributed systems, having recently completed a Backend Java Internship with Oracle Cloud Subscriptions (OCS), an Oracle Cloud Infrastructure (OCI) team. Experienced in Java backend services, REST APIs, persistence, scheduled workers, SQL generation, and automated testing. Available from October 2026 for full-time Software, Backend, or Platform Engineering roles.

Experience

Backend Java Intern - Oracle Cloud Subscriptions (OCS)

Mar 2026 – Sep 2026

Oracle Cloud Infrastructure (OCI)

Casablanca, Morocco

- Designed and implemented Mastering Auditor, a configuration-driven Java framework spanning OpenAPI/REST contracts, Dropwizard/Guice services, Hibernate persistence, scheduled workers, and extensible detector/action registries.
- Extended a validated SQL DSL with bound parameters, nested filters, joins, exclusions, partitioning, EXISTS, and GROUP BY/HAVING; added missing-transition/end-event detectors and SHADOW execution.
- Operationalized audits with dimensioned OCI metrics and Terraform/MQL alarms in the OCS configuration repository; deployed through the internal DevOps portal and validated signals in Metric Explorer.
- Correlated API, routing-shim, and worker logs with metrics/database state to diagnose end-to-end flows; added per-audit failure isolation, JUnit/Mockito coverage, and automated contact/commit-schedule order tests.

Cloud Infrastructure Intern

Jun 2025 – Aug 2025

MAROC DATACENTER (MDC)

Temara, Morocco

- Automated virtual machine provisioning with Ansible on a VMware vSphere private cloud backed by TrueNAS shared storage.
- Integrated DNS, monitoring, backup/recovery, and security services using PRTG, Veeam, and Wazuh.

Selected Projects

Local RAG Microservices Platform

Python, FastAPI, LangChain, Ollama, Chroma

- Built an offline document question-answering system with separate services for PDF parsing, embeddings, retrieval, and local LLM inference.
- Exposed REST APIs with FastAPI, provided a Streamlit interface, persisted vectors in Chroma, and packaged the system with Docker Compose and Kubernetes support.

BoardGameListing Website - CI/CD, Kubernetes & AWS Deployment

Java, Spring Boot, Jenkins,

Kubernetes, AWS

- Built a full CI/CD pipeline for a Java Spring Boot web application using GitHub, Jenkins, Maven, SonarQube, Trivy, Nexus Repository, and Docker.
- Containerized and deployed the application to Kubernetes on AWS EC2 using custom Dockerfiles and Kubernetes manifests; added KubeAudit checks and Prometheus/Grafana monitoring.

Technical Skills

Languages: Java, Python, JavaScript, SQL

Backend & Testing: Dropwizard, Spring Boot, FastAPI, REST APIs, OpenAPI, Guice, Hibernate, JUnit, Mockito, Maven

Architecture & Data: Distributed systems, microservices, asynchronous workers, SQL, MongoDB, Chroma vector database

Platform & DevOps: OCI, AWS, Azure, Kubernetes, Docker, Terraform, Git/Bitbucket, CI/CD, Prometheus, Grafana

Education

State Engineering Degree

Sep 2023 – Oct 2026

Ubiquitous and Distributed Systems Engineering - Cloud and IoT

National Institute of Posts and Telecommunications (INPT), Rabat, Morocco

Preparatory Classes in Technology and Industrial Sciences

Sep 2021 – Jun 2023

LYDEX, Benguerir, Morocco

Baccalaureate in Electrical Science and Technology (STE)

Sep 2020 – Jun 2021

Tassaout High School, El Kelaa des Sraghnas, Morocco

Leadership & Languages

Leadership: DevOps Cell Lead, CIT Club; Founder, INPT Runners

Languages: Arabic, Tamazight, French, English
