Professional Summary

INPT Engineer specializing in distributed systems and cloud, having recently completed a Backend Java Internship with Oracle Cloud Subscriptions (OCS), an Oracle Cloud Infrastructure (OCI) team. Hands-on experience with Java services, Kubernetes, CI/CD, Terraform, Ansible, and observability across OCI, AWS, and Azure.

Experience

Backend Java Intern - Oracle Cloud Subscriptions (OCS) Mar 2026 – Sept 2026
Oracle Cloud Infrastructure (OCI) Casablanca, Morocco

- Designed and implemented "Mastering Auditor", a configuration-driven Java framework (Dropwizard, Guice, Hibernate) executing asynchronous, scheduled operational checks with strict per-audit fault isolation.
- Engineered a shared configuration-driven query builder that renders safe, parameterized SQL for stuck-state and missing-transition detectors, eliminating duplicated query assembly.
- Operationalized framework observability by emitting dimensioned metrics to OCI Monitoring and deploying environment-aware MQL alarm policies via Terraform infrastructure-as-code.
- Validated end-to-end deployments across Dev2 and Preprod environments using internal DevOps portals, ensuring reliability with extensive JUnit, Mockito, and H2 automated test suites.

Cloud Infrastructure Intern Jun 2025 – Aug 2025
MAROC DATACENTER (MDC) Temara, Morocco

- Deployed an automated private cloud on VMware vSphere (ESXi/vCenter), with TrueNAS shared storage and Ansible-based virtual machine provisioning.
- Implemented DNS, PRTG monitoring, Veeam backup/recovery, and Wazuh security monitoring for a centralized infrastructure platform.

Selected Projects

3-Tier Application Platform on AWS AWS EKS, Jenkins, Docker, Helm, Terraform

- Built a GitHub-triggered CI/CD workflow with automated tests, SonarQube quality gates, Trivy scans, image delivery, and Kubernetes deployment to Amazon EKS.
- Configured Helm releases, namespaces, IAM roles, EBS storage, autoscaling node groups, and MongoDB Atlas connectivity for a production-like platform.

Azure Cloud-Native Pet Store AKS, App Service, Bicep, Azure DevOps

- Deployed a Java Spring Boot N-tier system using AKS, App Service, API Management, ACR, Functions, and Service Bus; provisioned infrastructure with Bicep.
- Automated delivery with Azure DevOps and GitHub Actions and instrumented the system with Application Insights.

Technical Skills

Cloud & Platforms: Oracle Cloud Infrastructure (OCI), AWS, Azure, VMware vSphere, Kubernetes, Docker, Helm, Linux

Infrastructure & Delivery: Terraform, Ansible, Bicep, Jenkins, GitHub Actions, Azure DevOps, GitLab CI, Maven, Git

Observability & Security: OCI Monitoring, Prometheus, Grafana, PRTG, Wazuh, SonarQube, Trivy, Veeam

Backend & Data: Java, Python, Spring Boot, Dropwizard, REST APIs, OpenAPI, SQL, MongoDB

Education

State Engineering Degree Sep 2023 – Oct 2026
Ubiquitous and Distributed Systems Engineering - Cloud and IoT
National Institute of Posts and Telecommunications (INPT), Rabat, Morocco

Preparatory Classes in Technology and Industrial Sciences Sep 2021 – Jun 2023
LYDEX, Benguerir, Morocco

Baccalaureate in Electrical Science and Technology (STE) Sep 2020 – Jun 2021
Tassaout High School, El Kelaa des Sraghnas, Morocco

Leadership & Languages

Leadership: DevOps Cell Lead, CIT Club; Founder, INPT Runners

Languages: Arabic, Tamazight, French, English
